

Wedding Makeup *Workbook*

A guided workbook to help you define your bridal makeup look, discover products that truly work for you, and build a routine that helps you shine—on your big day and into your happily ever after.

Welcome!

First of all—congratulations! You’re stepping into one of the most meaningful seasons of your life, and I’m truly honored to be a small part of your journey.

This guided workbook is more than just a space to plan your bridal makeup look—it’s a place to pause, reflect, and reconnect with yourself and your beauty routine. Whether you’re doing your own makeup, working with a pro, or navigating both, this workbook will support you in discovering the products, techniques, and practices that make you feel your most radiant.

Inside, you’ll set beauty goals, test products, and build your skills—all on your own terms. Most importantly, you’ll walk away not just with a plan for your wedding day, but with a deeper understanding of what works for you and why. Bridal beauty isn’t about perfection—it’s about growth, self-trust, and celebrating your unique glow.

So grab a pen, take your time, and enjoy the process. You’re not just preparing for one day—you’re building a lifelong relationship with yourself.

With excitement and intention,

Ellie the Bride
